

PIPELINE SERVICES

Streamlining pipeline projects

HGA has all the processes, engineering, and construction management expertise necessary for streamlining pipeline projects. Our team can help you project manage the coordination of your pipeline project and engineer the specific requirements, as well as working with a wide variety of procurement partners to meet pipeline construction project requirements.

HGA PIPELINE SERVICES PROVIDES:

- Right-of-Way acquisition
- Surveying
- Engineering
- Procurement
- Inspection
- Pipeline construction management

HGA MANAGES PIPELINE PROJECTS, SUCH AS:

- Onshore pipelines
- Compressor/pump stations
- Meter/regulator stations
- Processing facilities
- Field proven, industry-trusted ROW experts

Right-of-Way Acquisition

We are a group of seasoned industry professionals who understand the importance of quality and pay close attention to detail for all Right-of-Way (ROW) projects. We combine our skill sets with the full range of services, expertise, and rare insight to identify owners, title research and negotiating with landowners. Clients choose HGA for our collaborative style, integrity, and thoroughness at identifying potential ROW problems. They appreciate the sense of certainty HGA brings to projects as well as the results HGA produces. We make it a top priority to add value to each project.

Whether stand-alone right-of-way projects or fully integrated services, our engineering and field service professionals can serve your ROW needs, including:

- Route studies and estimates
- Courthouse research/title search
- Public agency coordination
- Project management
- Survey permission
- Land negotiating/acquisition
- Procurement
- Title research and curative
- Training
- Maintain landowner relations throughout the construction

Delivering Greater Surveying Solutions

The HGA pipeline survey solution provides high-quality survey services to support a variety of civil engineering, construction, and infrastructure mapping needs, utilizing the latest in geodetic technology and data management software to assist in everything you need to boost productivity and grow your business. Our areas of experience are assisting clients with mapping and design, advanced material tracking, regulatory compliance, and unique solutions that transcend industry challenges.

Our team collaborates with yours to deliver project consistency with on-site management, oversee facility needs, focus on comprehensive decision support and reporting, and deliver precise, detailed 3D technology design. Building on HGA's industry-leading pipeline capabilities, we evaluate potential approaches for achieving project goals, help identify ideal technical personnel, and then deliver the project on time, on budget.

We provide innovative and cost-effective survey and mapping services to meet your project needs, including:

- GIS Mapping & Consulting
- Centerline Routing
- Preliminary and As-Built Surveys
- Topographic Surveys
- GPS Horizontal & Vertical Control
- Facility As-Built
- Boundary Surveys
- Construction Layout
- Real Estate Development
- ALTA/ACSM Land Title Surveys
- UAV (Drone) Certified

Engineering Solutions to Design Optimal Solutions for your Project Challenges

Regardless of your pipeline project scale or complexity, HGA engineers collaborate with you to develop, implement, and design a customized

solution for your project. HGA engineering has extensive experience in civil, electrical, instrumentation, controls, mechanical, piping and structural engineering. Our expertise in pipeline engineering comes with experience and local knowledge, helping to achieve your project requirements, in terms of function, constructability, sustainability, and safety. HGA engineering teams offer complete services to help clients explore all options, risks and investment options with tailored, integrated solutions. Our staff provides the expertise and understanding you need to get a job completed—on time and on budget.

Engineering services for pipelines:

- Constructability reviews
- Compressor and pump stations
- Pipeline design
- Alignment sheets
- HDD design
- Launcher/receivers
- Valve stations

Streamlining procurement and supply chain management.

HGA leverages procurement partnerships, industry knowledge, and our supply chain network to deliver high quality, cost-effective procurement services. Based on the client's project or program, the procurement team leverages our partnerships to increase efficiency, reduce delays and lower costs.

Our procurement team streamlines service delivery across project operations through strategic sourcing, material management, and contract management functions with selected third-parties. For our clients, the procurement team offers the best prices, highest quality materials, and lowest risk, thus reducing project overall cost and increasing the value of the project.

Procurement resources:

- Bid docs/binding agreements
- Material specs
- Inquires/bid tabs
- Expediting
- Shop inspection/factory acceptance (FAT) tests

Delivering Success and Creating Value for our Customers Through Customized Construction Management Solutions

With extensive pipeline construction experience, our HGA construction management services integrate all services within the project scope to ensure that project scope requirements are met and completed on time. HGA construction management team will collaborate with you and be your valued partner to achieve program goals regardless of the complexity of the project. From concept to implementation to project delivery, project management is one of the key pillars to a successful construction project. Our construction managers are exceptional project managers, handpicked to provide seamless integration between all stages of the construction process. Additionally, our construction experts possess the engineering and construction experience to provide real-

world, cost-effective solutions to the everyday challenges throughout the construction process from start to finish.

Construction management expert services:

- Contracting strategies
- Inspection and construction management
- As-built data
- Construction specifications
- Program management (PGM)
- VistaTRAK®

About Us

Over the past two decades, HGA has built an unrivaled culture by listening to our clients, leveraging our experience and delivering on our commitments to an extensive portfolio of customers throughout the pipeline industry. The HGA pipeline services team offers a unique combination of experience and knowledge to help you assess, plan and manage your pipeline project. With years of experience, HGA provides pipeline service solutions that combine right-of-way acquisition, surveying, procurement, engineering, and pipeline construction management to help you meet your specific project goals. Everything we do is grounded on our core values of building long-term customer relationships by listening to our clients.

For more information on how HGA can help you with your next pipeline project, contact your HGA representative, email information@hga-llc.com or visit www.hga-llc.com.

WHAT MAKES US DIFFERENT?

Hunt, Guillot & Associates (HGA) is a multi-disciplined project management, engineering pipeline services, and program management company which provides professional services to an extensive portfolio of customers throughout numerous industries. HGA works in a broad range of industrial, public, and private sectors. Our expansive client roster includes Fortune 500 corporations. HGA has provided service offerings in more than 30 states, Canada, China, Mexico, and the Middle East.

In large part, HGA's success is attributed to a philosophy centered on a passion to help our clients succeed by aligning our approaches for success, growing with our clients, and sharing in their successes.

HGA works with clients to provide a quality product that is on schedule and on budget. Clients turn to Hunt, Guillot, & Associates for our proven engineering and project management services; our skills in procurement, construction, processes and reporting, responsiveness, and cost-effectiveness are instrumental in our success.

HGA offers clients extensive technical and operations knowledge of the Natural Gas Transmission Industry. The HGA Pipeline Team represents the "best in its class" for clients due to our:

Program management

Proven management expertise resulting from far-reaching experience managing multi-billion dollar projects from both the consulting engineering and operations standpoints.

Project management

Proven management and project control systems to manage long distance, large diameter pipelines totaling over 2,500 miles throughout the US.

Cost-effectiveness

One stop shop offering for field services, (Surveying, ROW, Inspection, and Environmental Coordination), which provides a more cost-effective and seamless approach to completing all facets of a pipeline project.

Project delivery

Innovative project methods and tools that provide cost-effective and quick response solutions to eliminate manhours that it once took to perform and drive projects to success.

HGA now utilizes an unmanned aerial system (UAS) to create 3D models of a facility, perform highly accurate surface topography surveys, and high-resolution aerial photography to name a few. HGA has developed tools used to generate alignment sheets and plats within our GIS software that has provided 30-40% man-hour savings in drawing development.

People

HGA Staffing has expertise in identifying, screening, and placing technical and industrial personnel that will assist in the success of your pipeline operation. HGA Staffing provides valuable industry expertise for hard to fill vacancies.

Experience

Proven management and project control systems to manage large programs: 450 miles surveyed with plats and alignment sheets in 2017 for one client in West Texas, up to 8 compressor stations at one time, completing over 50 compressor stations throughout the US, executing 8 interconnects on aggressive schedules, and completing over 100 interconnects throughout the US.

Meet your pipeline technical and operational objectives by collaborating with a pipeline group dedicated to advancing your project success.
