CLIENT

Cristo Rey Baton Rouge
Franciscan High School (Cristo
Rey Baton Rouge)

PROJECT TIMELINE

January 2017 – Present

PROGRAM VALUE

\$12.4 Million FEMA PA

SERVICES

- Program Management
- Construction Management
- PA Grant Management
- Project Management
- Project Worksheet Development

OVERVIEW

In August 2016, Cristo Rey Baton Rouge was devastated by Louisiana's devastating 500-year flooding event. In January 2017, they procured HGA to provide overall project management services. HGA's tasks include project worksheet development; construction management services; project controls; grant administration; and project closeout.

After damage assessments had been completed, the school had to be demolished, forcing staff and students to relocate to a temporary location beginning with the 2018-2019 school year, until construction of a new school could be completed.

SOLUTION

With a goal of returning Cristo Rey Baton Rouge administration, teachers, and students to a permanent facility as quickly as possible, HGA developed a path forward that followed the processes of disaster recovery to restore Cristo Rey Baton Rouge to its pre-disaster conditions. HGA also served as a liaison between Cristo Rey Baton Rouge, FEMA PA Project Specialist, and the Louisiana Governor's Office of Homeland Security and Emergency Preparedness (GOHSEP) with a focus on maximizing eligible, allocable federal funds.

HGA successfully assisted Cristo Rey Baton Rouge in getting funding for the leasing of temporary facilities in the amount of \$3.6 million, \$303 thousand for loss of contents, and \$8.5 million for a permanent facility.
