

Hurricanes Gustav & Ike

EAST FELICIANA PARISH, LA PROGRAM MANAGEMENT CDBG-DR INFRASTRUCTURE

Project Summary

Delivering on commitments. Building long-term relationships.

CLIENT

East Feliciana Parish Police Jury

PROJECT TIMELINE

December 2009 - December 2016

PROGRAM VALUE

\$3 million CDBG-DR

SERVICES

- Program Management
- Application Development
- CDBG-DR Grant Management
- Environmental Reviews
- Labor Compliance
- Monitoring Support
- Project Management
- Public Hearings

OVERVIEW

Hurricanes Gustav and Ike caused widespread damage to infrastructure in East Feliciana Parish. The Parish awarded HGA a contract for recovery services through a competitive procurement to repair damages and provide mitigation measures.

3 Infrastructure Projects

SOLUTION

HGA administered three infrastructure projects for East Feliciana Parish funded through their CDBG-DR allocation following Hurricanes Gustav and Ike. The projects included purchasing and installing generators for a town hall, water wells, and lift stations, in addition to the repair and improvement of roads. HGA assisted with the selection of the projects, planning, and the CDBG-DR application.

We facilitated interaction with key stakeholders; prepared environmental review records; conducted public hearings; ensured labor compliance through payroll reviews; and provided overall grant management through every phase of each project. HGA supported the Parish through a state monitoring and has successfully closed out the program.
