\$5.5 Million FEMA PA
\$2 Million FEMA HMA
\$565,000 CDBG-DR

TASKS

- Program Management
- 406 Mitigation
- Cost Matching
- Labor Compliance
- Project Worksheets
- Technical Assistance

OVERVIEW

HGA is providing project management for the FEMA Public Assistance (PA)– and Hazard Mitigation Assistance (HMA)-funded projects in East Feliciana Parish following the floods of 2016 and the COVID-19 pandemic. We are performing oversight and monitoring tasks, assuring that all federal funds have been properly accounted for in each of the Parish’s projects.

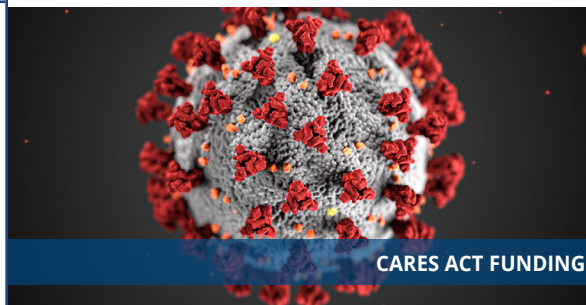

123 Roads | **2** Bridges

ROAD DAMAGES

BRIDGE DAMAGES

CARES ACT FUNDING

SOLUTION

HGA’s work includes preparing project worksheets (PWs) and damage inspection reports; providing monthly reports; providing project scoping and construction cost; providing technical assistance on FEMA policy and guidance; reviewing eligibility of contracts and force account labor; working to integrate funding sources (local, state, and federal) to implement post-disaster recovery and reconstruction on facilities, roads, and bridges; identifying 406 mitigation opportunities; acting as Parish liaison during FEMA/GOHSEP site visits; data collection and dissemination; processing requests for reimbursement through LouisianaPA.com and LouisianaHM.com; and cost reconciliation, payroll review, and CDBG-DR cost matching.

The original FEMA estimates for the Parish identified 20 roads and minor bridge repairs totaling \$88,000. After bringing on HGA, the Parish was able to increase its eligible projects to claim 123 roads and replacement of two bridges, for a total of eligible project PWs of over \$5.1 million.

We are also providing reimbursement assistance for their force account labor, emergency protective measures, proper procurement, and expenditures related to COVID-19.
